

Trojan Professional – Features & Benefits

SUSTAINABILITY & COMPLIANCE

- Our timber floor can be FSC® 100% with Chain of Custody certification if required. We can also offer 100% PEFC certified. Our floor also has an EDP – Environmental Product Declaration, and all of our products hold Floorscore (VOC emissions).
- Formaldehyde emissions with all our floors is Super E0.
- Our floor is legally sourced genuine French and German Oak.

TECHNICAL CONSTRUCTION

- Engineered lamella construction which is widely regarded as the most stable form of engineered timber flooring.
- Our standard range has a 3.2mm (14.2mm total thickness) to 6mm (20mm Total thickness) nominal face veneer combined with a hardwood core lamella construction.
- Our floor has been engineered to be direct stick or floating, with minimal to no expansion trims for a more appealing look.
- Floating installation removes the need for excessive floor preparation and double bonding, offering you maximised savings.
- Installation directly from the carton — no on-site acclimatisation required.
- Our floor is fit for purpose, making a wet mop suitable for routine cleaning.
- Skirting and kitchen cabinetry can be siliconed without voiding warranty.
- We offer a full warranty available for coastal developments.
- Over 25 years of proven performance in tropical environments.

DESIGN FLEXIBILITY & CUSTOMISATION

- Custom colours, board widths, thicknesses, and lengths available.
- Ability to match existing laminate or timber grain board finishes.
- Semi-fumed, smoked, and reactive stain treatments for enhanced depth of colour.
- High-performance coating systems available for increased wear resistance in high-traffic environments.
