

- Our timber Floor can be FSC 100% with chain of custody certification if required. We can also offer 100% PEFC certified. Our floor also has an EDP – Environmental Product declaration, and all of our products hold Floorscore (VOC emmisions)
- Formaldehyde emissions with all our floors is Super E0
- Twenty-five years of proven performance in our tropical environment.
- We can produce custom colours, widths, thickness, and lengths.
- Our floor is fit for purpose, and being so can be wet mopped.
- Our standard range has a 3.2mm (14.2mm Total Thickness) to 6mm (20mm Total Thickness) nominal face veneer combined with a hardwood core lamella construction.
- Our floor has been engineered to be direct stuck, or floated with minimal to no expansion trims which is visually more appealing.
- A floating installation removes the need for excessive floor preparation and double bonding offering you real savings.
- Our floor can be installed straight from the carton and does not require acclimatization on site.
- Our floor is a lamella construction which is widely regarded as the most stable construction for engineered floor.
- We offer a full warranty for coastal developments.
- Our floor can be siliconed against the skirting, without affecting our warranty.
- We offer semi-fumed, smoked, and reactive stains for deeper colour penetration, which can be combined with High Performance finishes for a harder wearing surface.
- All of our Oak range is genuine French and German Oak and are legally sourced.
