

TROJAN PROFESSIONAL

ENGINEERED TIMBER FLOOR

WHAT IS TROJAN PROFESSIONAL?

Trojan PROFESSIONAL is engineered timber flooring that sets standards, in terms of stability around the world with its multi-layer construction patented over fifty years ago. Engineered to withstand contraction and expansion, Trojan PROFESSIONAL is designed to protect against warping and de-lamination - a major problem that can occur with some types of timber flooring.

TIMBER FLOORING WILL ENHANCE AND SHOWCASE YOUR DESIGN CONCEPT

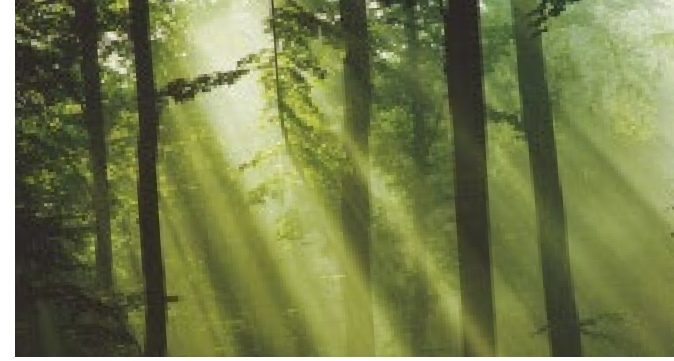

LONG-LASTING STABILITY THROUGH MULTI-LAYER CONSTRUCTION

OUR ENVIRONMENTAL RESPONSIBILITY

You can enjoy your beautiful Trojan PROFESSIONAL Timber floor knowing it is safe for our health and the health of our environment.

If sourced responsibly, timber is one of the most renewable resources in the world. By sourcing only through legal logging Trojan dutifully acknowledges our role in the chain of custody as an importer and supplier of timber flooring.

Next 13 supports the protection and maintenance of high conservation value forests.

Trojan PROFESSIONAL Engineered Timber flooring meets the European requirement for formaldehyde emissions in accordance with the E1 emission standards.

Trojan PROFESSIONAL Engineered Timber flooring conforms with the Building Code of Australia's requirements for flooring materials: spec c1.10 clause 3, floor lining critical radiant flux 1.2.

All our materials are legally sourced and meet stringent global environmental regulations.

Trojan's European Oak collection brings timeless European style into your design concept. Sourced from certified forests, Trojan's Oak timber is renowned for not only its beauty, but strength, density and hardness as a wood. With a colour palette that embodies prestige, elegance and style, the European Oak collection is sure to impress.

We are delighted to showcase a small sample of our top selling Oak floors here. However, we offer an extensive range, please visit our website to view our full collection.

Crafted by hand, each plank can be produced with custom features including surface variations, textures, knots, widths, plank lengths and colours. If you need further inspiration we can custom make a floor to suit your specific requirements. Contact us for more information

TROJAN IQ - PREMIUM ACOUSTIC UNDERLAY

Trojan IQ is Trojan's premium acoustic underlay, which offers excellent noise reduction properties and is a moisture inhibitor. It can be used in both residential and commercial applications. This underlay significantly reduces foot traffic noise and sound transmission. Trojan IQ underlay is recommended for use under any PROFESSIONAL engineered timber flooring installation where superior acoustic performance is required.

Please check body corporate requirements before installation, as not all sites are the same. Where acoustic requirements are critical to your design objectives, we would always recommend an affordable acoustic test be conducted on site.

WHY IS QUALITY UNDERLAY IMPORTANT?

- ✓ Fills small undulations in the floor to help provide a smoother surface.
- ✓ Provides underfoot cushioning to hard concrete or timber subfloors.
- ✓ Improves acoustics - reduces rebound sound and noise transmission to lower levels in multi-story commercial and residential buildings.
- ✓ Trojan IQ has a built-in moisture-resistant barrier to help protect the timber floor.

Please note: Trojan IQ is not designed to completely seal the subfloor or as a solution to rising damp. In such circumstances, the subfloor should be sealed prior to the installation of underlay and timber floor.

30-YEAR STRUCTURAL WARRANTY

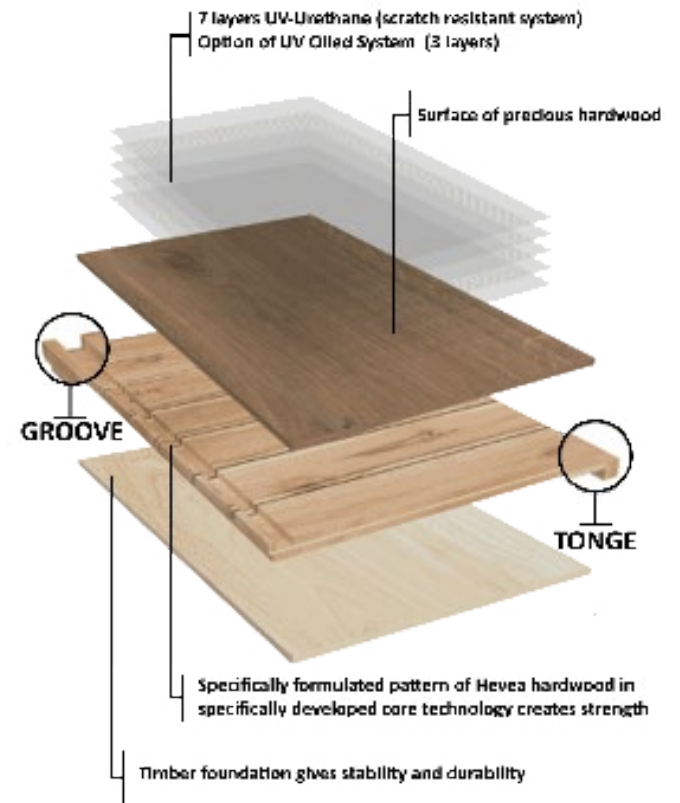

Your new Trojan engineered timber flooring comes with a 30-Year Structural Warranty.

The structural warranty guarantees that the multi-layer system of your engineered timber floor will not de-laminate for a guaranteed period of thirty years.

This is conditional on the floor being subject to normal use. The warranty is not applicable where the floor has been subject to flood or misuse.

Conditions apply. For a complete copy of the warranty, visit www.next13.com.au

Trojan PROFESSIONAL engineered timber floorings multi-layer construction ensures your floor not only looks the part, but also has the performance to match.

To ensure the optimum performance of your floor and full coverage of the product warranty, please adhere to all instructions relating to the subfloor, installation environment, installation method and care and maintenance guide. For more information including warranty conditions, care instructions, installation advice and technical data sheets, please visit our website or contact us directly.

Any samples viewed or provided are a guide to colour only and not a guarantee that all planks are the same.

Please note: pictures contained in this brochure are for illustration purposes only. Print and electronic depictions of the timber may differ to the actual product colour.
